01 Fill the refill bottle with acrylic paint (Art Proff). Now draw a design on the canvas panel using the fine drawing tip on the refill bottle. Leave to dry.

02 Paint the design over with the acrylic paint, undiluted or diluted according to taste. Leave to dry for approx. 30 minutes.

03 Variant No. 1: Use a flat foam stencil brush for lightly painting with a different colour over the relief design further emphasizing the effect.

04 As an alternative to the option mentioned above, you may use a foam stencil brush moistened with water and then applied over the relief design, which highlights the colour of the relief.

05 Variant No. 2: Paint a painting with a design according to your taste. Leave to dry and then bring out the outlines and details.

Tekniikkakoulu: Kohokuvapiirustus

Kohokuvointi on tekniikka, jossa kuvan reunat ja yksityiskohdat jäävät koholle. Mallissamme on käytetty akryylimaalia ja hienokärkistä täyttöpulloa.
