**1**

Start by staining the front of the gift tag by applying Paper Soft Color with circular movements using a foam brush.

**2**

Now stamp the design onto the gift tag, preferably with the same colour as the one used for the background. The design always turns out darker when stamped compared to when stained with the foam brush.

**3**

When the stamped design is dry, put a flexible stencil onto the gift tag and apply Paper Pen in a matching colour with a pallet knife. Remove the flexible stencil immediately and rinse it thoroughly.

**4**

Finish by decorating with Paper Pen and matching ribbon.
