

Pitkäjalkainen lintu

Tämä lintu on tehty styroxpallosta ja -munasta, jotka on päällystetty paperimassajauheella. Kuivumisen jälkeen lintuun on lisätty pitkät jalat vaijerista. Lopuksi lintu on maalattu Plus Color-askartelumaalilla.

Inspiration: 14570

1

Soak papier-mâché powder in water in the ratio: 3 parts powder to 1 part water.

2

Cover each part with papier-mâché pulp.

3

Place the ball on top of the egg for a bird's body and cover the joint with papier-mâché pulp. Shape a beak and wings along the back.

4

Double over three thick stub wires and gather them with a thin stub wire. Make the feet by twisting thin stub wires around each end of the assembled stub wires approx. 4 cm from the ends. Bend approx. 1 cm from the wound-around stub wires, so that each foot is approx. 3 cm long. Push the legs into the bird and cover this area with papier-mâché pulp. Leave to dry.

5

Paint the bird all over with white Plus Color craft paint. (A TIP: The long legs work as a practical handle during this procedure). Leave to dry. Mix the white paint with black for a light grey colour and dab the paint onto the bird with a foam stencil brush. Leave to dry.
